# STONE-GARD™

24 Hour Topcoat for Stone-Flecks

Introducing...

## STONE-GARD™ Protective Topcoat for Countertop Refinishing

### What is STONE-GARD?

STONE-GARD is a two-component satin finish topcoat designed to mimic the look, impact resistance, and durability of a real stone surface. STONE-GARD delivers maximum protection and coating lifespan for Hawk's STONE-FLECKS™ multi-colors for countertops. STONE-GARD is superior to real stone because it is stain and acid resistant, and requires no annual cleaning and sealing...a key selling point to your customers considering real stone countertops.

### Why use STONE-GARD?

Advanced curing agents in the STONE-GARD formula deliver faster dry to tack and dry to touch times, which means that you can quickly remove masking and caulk in as little as 20 minutes and allows you to put counters back into service the next day, making your service more appealing to your customers. STONE-GARD has proven it's "rock hard" durability over other clear and satin finish products on the market...try it and experience the difference!

## STONE-GARD 24 Hour System

- ▶ Superior durability
- ▶ Improved formulation
- ▶ 24-hour cure
- ▶ Faster clean ups
- ▶ Easy to apply
